Vijay Praveen Dasari

Email: vijaypraveend@gmail.com
Mobile: +91 9490498912

Experience Summary

- Working as a **Senior Software Engineer** for **Prokarma.**
- Professional experience of **5.5 years** in IT industry using **Microsoft.NET Technologies**
- Has a wide range of experience in covering requirement gathering and analysis design, development and implementation life cycle stages.
- Good Knowledge in **Object Oriented Programming** and **Design Principles** concepts.
- Good Understanding of **Microsoft Azure**
- Good at Debugging, Troubleshooting and Understanding the System.

Technical Summary

- **Languages**: C#, SQL, Java script and Typescript
- **Framework**: ASP. Net Core Web API. Asp.Net (MVC/WebAPI2)
- **Frontend**: HTML, jQuery, Angular 8.
- **Technologies/Approaches**: MS Test, Moq, Microservices, Active MQ
- **ORM Approaches**: Entity Framework, LinqToDB
- **Database**: MS SQL, PostgreSQL
- **Tools/Repository**: Visual Studio (2019/Code), SSMS, PG Admin, TFS, Git

Educational Qualification

- **Graduation:** May 2015 – B.Tech Graduate from Department of **Computer Science Engineering**, Andhra University with a CGPA of 8.12.
- **Polytechnic:** May 2012 - Completed Diploma in **Computer Science Engineering** in Smt B Seetha Polytechnic,Bhimavaram with 85.84%
- **High School:** April 2009 - Completed S.S.C from Viveka Public School, Mogaltur, Andhra Pradesh with 81.5%.

Professional Experience

- Working as **Senior Software Engineer** for **Prokarma** , from August 2019 to till date
- Worked as **Systems Engineer** for **Tata Consultancy Services Limited**, from June 2015 to August 2019.

Professional Accomplishment

Project #1: Stenograph-Apex

Client	**Stenograph**
Role	.NET Developer
Team Size	15

Domain   Legal Domain
Project   Apex Solution

Technologies   C#, .Net Core Web API, PostgreSQL, LinqToDB, Angular 8

Project Summary

       The project involves the analysis, design and development of Apex Solution , which provides the court reporting industry with a truly bespoke toolset. With APEX, agencies will maximize their bottom line through workflow optimization, efficiency gains in order management, scheduling, transcript production, video synching, exhibit linking, and billing, and will also be able to take advantage of features to enhance communication and collaboration with reporters.

       Stenograph has been the leader in providing cutting edge technologies to court reporters and in empowering the capture, preservation, and accessibility of verbatim records.

.**Roles & Responsibilities:**
- Discussions with product management team based on the requirements document to determine the expected functionality of the system and resolve any operational or technical issues
- Analysis and evaluation of alternatives to formulate the mode of implementation of the business requirements.
- Analyzed and worked on the low-level artefacts for the few key modules in the project.
- Understanding the user stories and analyzing the effort to time estimates.
- An effective team member with proven abilities to be a part of the team during the project phase and guiding team members.

Project #2: Revenue Life Cycle Management

Client   **DaVita Healthcare Partners Inc.**
Role   .NET Developer
Team Size   30
Domain   HealthCare
Project   Nautilus

Technologies   C#, MVC.Net, Entity Framework, SQL Server, JSON, HTML, JQuery.

Project Summary

       The project involves the analysis, design and development of a Revenue Life Cycle Management System, which would generate medical claims, Pricing of the Medical services in the claim and Settlement of the Claim.

       Nautilus is a revenue cycle management product that has been developed to replace the customer's existing billing application, which is an off the shelf product supported by several satellite applications. The customer is a leading health care provider in the US and a Fortune 500 company. Nautilus is broadly divided into three functionalities i.e. Setup, Billing

and Collections. Setup is the UI component of the system using which users can define Payer Contracts, Service Rates, Single Patient Agreements, Claim templates etc. This data will in turn be consumed by billing which is the actual core of the system. Billing involves service processing, service pricing, claim rendering and submission. Collections part of the system is used to take care of Payment processing, Correspondence, Denials, Claim Resubmission, Claim Correction etc.

Roles & Responsibilities:

- Discussions with product management team based on the requirements document to determine the expected functionality of the system and resolve any operational or technical issues
- Analysis and evaluation of alternatives to formulate the mode of implementation of the business requirements.
- Analyzed and worked on the low-level artefacts for the few key modules in the project.
- Understanding the user stories and analyzing the effort to time estimates.
- Suggested areas of improvement in the application which helped in performance enhancement.
- Worked on data migration for various enhancement requirements.
- An effective team member with proven abilities to be a part of the team during the project phase and guiding team members.

Achievements:

- Awarded with STAR of the Month Award in Mar 2017 for Excellence in the project and On the Spot Award for fixing Performance Issues in the application.
- Got awarded from client for providing defect free product with excellent efficiency in the product delivered.

Personal Profile

Name	:	Vijay Praveen Dasari
Date of Birth	:	09th June 1994
Marital Status	:	Single
Passport	:	Yes
Address for Communication	:	Flat No : 305 A, Gulmohar Colony Park Serilingampally Hyderabad -500019.

Place: Hyderabad   (Vijay Praveen Dasari)
